		18' x 44'

Heavy-duty buttress system

Imagine spending your leisure time in a beautiful resort. With the **PACIFIC** pool, your dream can become reality in your own backyard.

- The exclusive Tilestone pattern has been designed to add traditional beauty with a contemporary flare, ensuring a great look in any backyard.
- The **PACIFIC** pool is manufactured with both resin and steel components. These materials are integrated to provide the best combination of strength & durability available in pool technology today.
- The pool features a large 7" extruded steel ledge and 2 piece form fitting resin cap. Resin components provide durability where it is most needed and carry a lifetime warranty.
- The wall and all other frame components are made of hot dipped galvanized steel giving the pool the strength it needs to contain thousands of gallons of water. They are primed, painted, and coated with clear liquid vinyl for true weatherability.
- The **PACIFIC** oval pool is available with a traditional buttress system or a new space saving Narrow Buttress System "NBS". Both systems use heavy gauge steel components to create a true straight sided oval.

Let your dream become reality, with the **PACIFIC** pool it *is* possible!

DO NOT JUMP OR DIVE INTO ABOVEGROUND POOLS
